DETAILED ACTION

Response to Amendment

1. Applicant's amendments and accompanying remarks filed 8/15/01 have been entered and carefully considered. Applicant's amendment is found to overcome the claim objections and 112 indefinite rejections set forth in the last action. Despite this advance, the amendments are not found to patentably distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Objections

2. Claims 4, 22-23, and 25 are objected to because of the following informalities: Please replace the word "fibre" with the more conventional U.S. spelling: "fiber." Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 4-9 and 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meeks (5830092) in view of Zocher (3340586), as set forth in the last action.

Applicant has amended the claims to specify that the needles penetrate the surface of the batt at a plurality of angles. Applicant argues that the angle of penetration of the web's surface is always the same in Zocher. However, the examiner cites fig. 3, wherein Zocher teaches curved needles penetrating the surface of the batt

at various angle. The needle on the left appears to be entering the surface of the batt at approximately a 45 degree angle, while the needle on the right appears to be entering the surface of the batt at approximately a 315 degree angle. Said rejection is maintained from the last action.

With respect to the newly added process limitations of claims 22-24, it is the examiner's position that the needlefelt created by said combination is identical to or only slightly different than the needlefelt prepared by the method of applicant. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or an obvious variant from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the applicant to show unobvious differences between the claimed product and the prior art product. *In re Marosi*, 218 USPQ 289, 292 (Fed. Cir. 1983). Said combination either anticipates or strongly suggests the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the specification or in a submitted Declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with the needlefelt created by said combination.

With respect to newly added claim 25, it is the examiner's position that the needled web created by the combination of Meeks and Zocher would inherently have a

fiber density which varies across the thickness of the web. The examiner notes said combination utilizes the same materials processed in the same manner as applicant's web.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
